

CS577/EE537

Advanced Computer Networks

Summer 2003
Professor Bob Kinicki

Course Objectives

- To grasp the **current direction** of computer networks research.
- To provide in-depth coverage of three research areas **{a limited breath goal}**.
- To fill in gaps in students' networking knowledge.
- To prepare students to conduct research.

Course Objectives

- To refine research skills:
 - To develop literature searching and literature review techniques.
 - To analyze and evaluate published results.
 - To improve oral and written communications skills.
 - To better understand experimental methodology.
 - To appreciate performance evaluation issues.
