

Computer Networks Reference Textbooks

The following is a list of current networks textbooks that students might find useful as references and alternate sources for understanding networking concepts.

General Networks Texts

- [Tan] **Computer Networks**, *Fifth Edition*, A. Tanenbaum, Prentice-Hall, 2011.
- [DCC] **Data and Computer Communications**, *Ninth Edition*, W.S. Stallings, Pearson Prentice-Hall, 2011.

[P&D] **Computer Networks, A Systems Approach**, *Fourth Edition*, L. Peterson and B. Davie, Morgan Kaufman, 2007.

[LG&W] **Communication Networks, Fundamental Concepts and Key Architectures**, *Second Edition*, A. Leon-Garcia and I. Widjaja, McGraw-Hill, 2003.

[Com] **Computer Networks and Internets**, *Fifth Edition*, D.E. Comer, Pearson Prentice-Hall, 2009.

[Hal] **Computer Networking and the Internet**, *Fifth Edition*, F. Halsall, Addison-Wesley, 2005.

[B&G] **Data Networks**, *Second Edition*, D. Bertsekas and R. Gallager, Prentice-Hall, 1992.

Routing Texts

Routing in the Internet, *Second Edition*, C.Huitema, Prentice-Hall, 2000.

Routing in Communications Networks, M. Steenstrup, Prentice-Hall, 1995.

Interconnections - Bridges and Routers, R. Perlman, Addison-Wesley, 1992.

LAN Texts

Local and Metropolitan Area Networks, *Sixth Edition*, W. Stallings, Prentice-Hall, 1999.

Wireless Texts

Wireless Communications and Networks, *Second Edition*, W. Stallings, Prentice-Hall, 2005.

Wireless Sensor Networks, F.Zhao and L. Guibas, Morgan Kaufmann, 2004.
